

PRODUCT ANNOUNCEMENT FROM MILLETEKNIK

Milletechnik makes changes and it affects some products.

DESCRIPTION

Following customer requests and internal quality control, we have updated the DIN adapter to a new version.

DIN adapter has been updated.

What changes?

DIN adapter has received several updates:

1. Hooks for attachment to DIN rail have been improved and reinforced.
2. Stiffness has been reinforced. The length has increased by 0.5 mm to 89 mm.
3. The width has increased by 0.5 mm to 39.5 mm.

What doesn't change

PCB slot size is identical.

The change does not affect the function of products DIN adapter fits.

Products with an earlier version do not need to change to the new version.

As the new version is an improvement of the existing product and neither affects function nor safety, service measures do not need to be performed on devices that have an earlier version.

When the change is expected to take place

The change has entered into force. Products at partners and distributors may have the previous version in stocked products.

Affected products

- NEO 24V 15A FLX M
- NEO 24V 25A FLX M
- NEO 24V 15A FLX L
- NEO 24V 25A FLX L
- NEO 24V 15A FLX M Display
- NEO 24V 25A FLX M Display
- NOVA 24V 15A FLX M
- NOVA 24V 15A FLX M
- NOVA 24V 15A FLX L
- NOVA 24V 15A FLX L
- NOVA 24V 15A FLX L
- PoE M-switch 8p FLX M
- EN54 24V 15A FLX M
- EN54 24V 25A FLX M
- 2+2 Output module
- 2 Output module 15A
- 5 Output module
- 8 Output module PTC
- 230V Redundancy Kit
- Voltage Converter 24V-12V 2A
- Voltage Converter 24V-12V 6A
