

1. PRODUCT ANNOUNCEMENT FROM MILLETEKNIK

Milleteknik makes changes and it affects some products.

2. DESCRIPTION

Milleteknik implements a change in the packaging for some smaller options and accessories.

The new carton is designed to be more durable, user-friendly and resource efficient.

	Width, mm	Height, mm	Depth, mm	Weight
Cardboard as <u>shall be deleted</u> :	215	120	165	0.1 kg.
Cardboard as <u>replaces</u> :	210	100	155	0.1 kg.

2.1. What's changing

We introduce a new cardboard box that replaces the previous white model. The new cardboard is brown, more compact in format and completely tape-free. The closure is done via adhesive on the inside of the carton and a perforated tear strip which makes it easy

2.2. What is not affected?

It is important to emphasize that the products themselves do not change. This change applies only to the outer packaging

Unchanged factors:

- The contents of the carton.
- Functionality and technical specifications of the product.
- Item number and E-number.
- Delivery time - Packaged weight.
- Product documentation and approvals.
- Packaged weight.

2.3. When the change is expected

From April 2025, the new cardboard will begin to be used. During a transition period, both the new and the previous model may appear in parallel depending on the stock

2.4. Products affected¹

Article designation	Item No.	E-number
10 Output module for 1U02	A-FU002410OP02	5213712
